REPUBLIC TIRES
With SAFEGARD Studs

OUR fully equipped repair shop is available to all motorists.

Our skilled repairmen are ready to render complete tire service at all times.

We are glad to explain to all car owners the economy of Republic Tires.

We know from our own experience that Republic Tires do last longer.

We know that they wear down evenly and slowly—somewhat as steel wears.

We know they suffer very, very little from the cutting and chipping to which ordinary tires are subject.

Republic Tires and Tubes, both Black-line Red and Gray, are made by

FRANK RIPPY, of Anderson county.

AUTO BUSINESS

ON THE IMPROVE

Richmond auto dealers are enjoying a revival in business and with few exceptions, report that there has been a decided improvement during the brief period of favorable weather, and the improvement in railway shipping facilities. There have been a very creditable list of new machines sent out of the city during the past week and there are several sales where the autos have not been delivered. Indications point to a very successful season after all, dealers claim, one of them asserting that all was needed was the cars, and a little nice weather.

DIXIE COMPANY

HAS GOOD BUSINESS

The Dixie Auto Company is forging to the front with a good list of sales this week, and report that while business is good, it would be better if they had the machines to do it with. They have been fortunate however, in that they had a good supply before the railway strike came on. They admit a number of sales that cannot be delivered however, owing to the railway situation.

The following sales are reported as having been delivered: G. W. Goodloe, of Richmond, a Studebaker sedan; B. L. Kearns, also of Richmond, a Studebaker special six; E. J. Moore, a big Studebaker Six, and Walter Wells, of College Hill, a Chevrolet.

Luxon Folks Are Busy

The Luxon garage folks are busy these days; they report having sold a seven passenger Chandler to Conard Long, and a Paige to Morris Wides. The company is installing a paint shop and a top making department and this acquisition will add very materially to their business, and facilities for handling auto work generally.

J. F. Reeves reports the sale of an Auburn Beauty Six, to Geo. Dozier, of Red House.

Mr. Reeves stated that he had sales for more machines but was unable to get them here to his customers. The weather is such now that he is unable to have them brought overland from Cincinnati.

MOTOR TRUCKS USED

TO COMBAT OHIO STRIKE

One hundred motor trucks at Akron, O., with 1,000,000 pounds of raw material and other supplies are on the road to the factories of the Goodyear Tire & Rubber Co. here from the east. This method taken in the face of the railroad tieup due to the strike of switchmen, is the first of so large proportion in the history of motor transportation. It is a test of the usefulness of long distance freight hauling by motor and a further step toward the reduction of railroad freight congestion.

LOOK - LOOK - LOOK

Stretch means toughness. Toughness means wearing quality.

And wearing quality means service. Prove it for yourself by trying.

GATES HALF SOLE
Service and satisfaction is our motto.

Give us a trial and take the worry out of riding.

THE MOST BEAUTIFUL CAR IN AMERICA

THE man who tempers economy with wisdom directs the expenditure of his money judiciously. He is more concerned with ultimate values than with mere cheapness of price.

It is to this type of person among motorists that the Paige car most appeals.

We, of the Paige Company, have always taken the view that unless a car has the qualities essential to comfort, lasting satisfaction and pride of ownership, it would be dear at any price.

So we built the Paige Glenbrook according to our ideas of what a real motor car should be—a car which would be not only a reliable vehicle of transportation but also a car of beauty, comfort and power.

PAIGE-DETROIT MOTOR CAR COMPANY, DETROIT, Michigan

Manufacturers of Paige Motor Cars and Motor Trucks

LUXON GARAGE

Richmond, Kentucky

With the demand for the Paige Glenbrook far exceeding our almost production efforts, a prompt decision is advisable. Orders placed now mean just so much more of the best touring season assured for your enjoyment.

DEMONSTRATES IN USUAL WAY

New Dixie Auto Company, local Studebaker Dealer, tells a story that illustrates easy-riding qualities in an automobile, demonstrated in an unusual way.

It seems that an owner of a Studebaker Special-Six took a friend of his out riding not long ago. The friend noticed, as he sat in the front seat, that the speedometer was covered, mentioned this fact to the owner, and asked the reason for it.

"Just a little idea I have," replied the owner.

They drove through town and then hit the open road. Pretty soon the friend noticed that the car was creeping up a bit in speed. The owner turned to him and asked:

"How fast do you think we are traveling?"

"O, about 25 miles an hour", came the answer.

"Well, you're pretty close", said the owner. "Just take that cover off the speedometer, and we'll see."

The friend did as suggested, and

the speedometer showed 42 instead of 25 miles an hour.

"A lot of people still judge the speed of all cars by the amount of noise, swaying and general vibration," comments Mr. Hill. "Just because a car travels along quietly and smoothly, they think it must be going slow. That used to be the case. There was a time when an automobile hitting 20 miles an hour or more shook and labored to an extent that was very obvious to the driver and others occupants. Some people still judge the speed of a car by the old standards. In fact, there are few today who are not deceived in guessing the rate at which an automobile is traveling."

"Just to show how motor cars have advanced in the direction of comfort, steadiness and smoothness on the road, the engineers of the Studebaker Series 20 cars have developed them to the point where today they can travel 55 to 60 miles an hour, mile after mile, without uncomfortable vibration or apparent effort. Scientific balance and other refinements in design explain how this has been made possible."
